SUMMARY

Senior Data Analyst with 4 years of experience in SQL, Power BI, Python, data modeling and real-time operational analytics. Translates business questions into trusted metrics, self-service reporting and actionable recommendations for cross-functional stakeholders. Builds end-to-end data products on Google Cloud (BigQuery) in personal projects and uses AI tools responsibly to prototype and improve reports before they are built.

EXPERIENCE

Senior Data Analyst, Turkish Aerospace, Ankara, TR — Jul 2024 – Present

- Partnered with cross-functional stakeholders to translate business requirements into scalable data models and reporting solutions, and maintained documentation for reports and data models.
- Defined shared metric logic and KPI definitions with stakeholders, including the calculation of a custom productivity metric, establishing a single trusted source for performance reporting across teams.
- Designed an automated performance-tracking data model and Power BI dashboard consolidating real-time operational data streams, improving visibility into key metrics by 25%; recognized by external assessors as a "world-class" best-practice example.
- Designed resource-planning and utilization dashboards by integrating operational source systems into automated ETL pipelines, increasing efficiency by 15%.
- Conducted root-cause analysis on a rising operational cost metric, identifying key drivers and delivering a 10% reduction through targeted process changes.
- Built dynamic backlog and inventory-availability reports, reducing fulfillment delays by 20% and improving prioritization for planning teams.
- Converted recurring ad-hoc requests into parameterized, self-service reports and improved report discoverability through metadata optimization, reducing repeat requests to the analytics team.
- Designed and maintained the SQL Server data modeling and transformation layer (stored procedures, scheduled jobs) with built-in data validation (reconciliation, key-integrity and freshness checks).
- Adopted a prototype-first, AI-assisted reporting workflow (Claude, Claude Design), validating designs with stakeholders as MVPs before build and increasing first-time-right report delivery.

Data Analyst, Digital Transformation, Turkish Aerospace, Ankara, TR — Nov 2022 – Jul 2024

- Led the design of a real-time data-instrumentation architecture, connecting 60% of operational touchpoints and giving stakeholders real-time visibility into day-to-day operations.
- Built real-time monitoring dashboards (Grafana, SQL, ETL), improving data traceability and increasing operational efficiency by 30%.

PROJECTS

Training Performance Dashboard, personal project, acozdemir.com/projects/training-performance-dashboard — Sep 2026 – Oct 2026

- Built an end-to-end data product on my own training data: a nightly Python pipeline on Google Cloud loads Strava API data into BigQuery and serves a web dashboard and a Looker Studio report (AI-assisted development with Claude Code).
- Defined the training-load metrics and validated them against an independent model (r = 0.955), with least-privilege access, monitoring alerts and automated tests.

EDUCATION

B.Sc. Industrial Engineering, Hacettepe University, Ankara, TR (GPA 3.54/4.0, High Honor) — Oct 2017 – Jun 2022

Erasmus+ Exchange, Logistics & Supply Chain Management, Duisburg-Essen University, GER — Apr 2021 – Sep 2021

SKILLS

Programming & Querying: SQL (T-SQL: window functions, CTEs, PIVOT/UNPIVOT, execution plans & indexing), Python, DAX
BI & Visualization: Power BI (data modeling, DAX), Power BI Report Server, Report Builder, Looker Studio (project-based), Grafana, Tableau (working knowledge via training), Excel (Pivot Tables, XLOOKUP, Power Query)
Data & ETL: MS SQL Server, PostgreSQL, BigQuery (hands-on via personal project and case studies), stored procedures, scheduled jobs, Star/Snowflake data modeling, Node-RED
Cloud (project-based): Google Cloud: BigQuery, Cloud Functions, Cloud Scheduler, Secret Manager, IAM, Cloud Monitoring
Analytics & Modeling: Metric & KPI Design, Statistical Analysis, Data Validation, Root-Cause Analysis, Trend & Variance Analysis
AI & Tools: Claude, Claude Design, Claude Code, AI assistant workflow design (skills, connectors, scheduled tasks), AI-assisted reporting, Jira, Git/GitHub, Docker
Languages: Turkish (Native), English (C1), German (A1)

CERTIFICATIONS & VOLUNTEERING

McKinsey Forward Program (2023) | iTEP English C1 (2022) | SSI Dive Master (2024) | Innovation Ambassador, Turkish Aerospace (Dec 2023 – Present)
